ABSTRACT

ANALYSIS OF THE EFFECT OF THE RIGHT ISSUE ON STOCK PRICES ON COMPANIES RIGHT ISSUE LISTED ON THE STOCK EXCHANGE IN 2012

In the development of its business the company requires substantial funds, to get the fund companies right issue. Right Issue it is right issue to subscribe shares in advance. With the right issue the number of shares outstanding will increase in this case will indirectly affect the stock prices. This study is intended to test the independent variable (Right Issue) that could be expected to affect the dependent variable (stock price) by way partial. To determine how much influence the Right Issue on stock prices, then used statistical analysis tools SPSS. The data analysis technique used is simple linear regression. meanwhile, to test the hypothesis formulation used t test. Population in this research are companies that does the right issue once registered on the stock exchange Indonesian (BEI) in 20112 as many as 23 companies. Sampling in this study using a sample that is the overall saturation of the population. Test results (partial) Right Issue show that the partial effect on stock prices. Right Issue where a significant level of 0,012 less than 0.025 ad the value of t_{hit} for 2,760 bigger than t_{tab} amounted to 2,086.
